

## 4-pc. Gear Puller Set

PRODUCTS > AUTO SERVICE TOOLS > GEAR PULLERS AND SEPARATORS

Smoothly and safely slide gears, pulleys, flywheels and other press-fit parts off shaft with the versatile TEKTON 5702 4-pc. 3-Jaw Gear Puller Set. Four pullers fit a wide range of sizes and feature a universal design that can grip eight different ways: around outside edge or through inside openings while set in short, standard, long or extra long reach positions. Three jaws evenly distribute powerful pulling forces, protecting edges of gear from bending or chipping damage. Turn drive screw with any style hand wrench or ratchet and the precise, cold-rolled acme threads glide along smoothly without binding or chattering, even under high stress.

### Specifications:

- Three-jaw design evenly distributes pulling forces to slide gears, pulleys, and flywheels off shaft without damage
- Universal 4- or 8-position reversible jaws offer inside or outside grip and short, standard, long or extra long reach
- High-strength forged and hardened steel jaw arms
- Cold rolled, acme-threaded steel drive screw for smooth operation even under high stress
